

CASE STUDY · K-12 EDUCATION

A school district puts eyes on what matters in a Special Education classroom.

Students were getting into a storage room that held medications and sensitive materials. Weaver recommended one targeted Verkada camera that fit the district's existing platform, with no new infrastructure required.

THE CHALLENGE

A storage room that needed to stay secure.

The district is a Texas public school district committed to providing a safe learning environment for every student, including those in specialized programs. The district has relied on Weaver for Verkada camera installation and configuration across its facilities, building trust over multiple projects.

A storage room inside a Special Education classroom had become a safety concern. Students were gaining unauthorized access to the space, which held medications and other sensitive materials that needed to stay secured.

The district needed a targeted, minimally intrusive solution: visibility into the storage area without disrupting the classroom or requiring significant infrastructure changes.

THE STARTING POINT

Medications

Stored in a room students were entering without authorization

1 classroom

A Special Education space where disruption had to be kept to a minimum

Existing platform

The fix had to work with the district's existing Verkada platform

THE APPROACH

The Weaver Way: proportionate to the problem.

Weaver recommended and deployed a focused Verkada camera solution for the storage closet. The approach was deliberate and proportionate: the right technology for a specific problem, integrated with the district's existing Verkada environment.

Because Weaver already knew the environment from prior Verkada installations, the team could recommend the right solution quickly and with confidence.

PROJECT CAPABILITIES

Verkada camera deployment	Physical security consulting	K-12 campus safety
Existing infrastructure integration	Camera configuration	Continuous storage-area monitoring

Not every security challenge requires a large-scale overhaul. The Right Reason means recommending a focused, proven solution rather than an overly engineered one, and delivering exactly what student safety requires.

THE RIGHT REASON · WEAVER TECHNOLOGIES

THE RIGHT IT SOLUTION

One camera, on the platform the district already runs.

Weaver deployed a Verkada camera inside the storage closet to provide continuous, discreet monitoring of the secure area. It was selected for its reliability, ease of management and compatibility with the district's existing Verkada platform.

VISIBILITY

Verkada camera in the closet

Continuous, discreet monitoring of the storage area where medications and sensitive materials are kept.

INTEGRATION

Existing Verkada platform

Managed alongside the district's other Verkada cameras. No standalone system to run.

MINIMAL FOOTPRINT

No new infrastructure

Installed and configured with minimal disruption to the classroom and its students.

THE RIGHT TIME

In place quickly, because the concern was ongoing.

The district needed a solution as quickly as possible, given the ongoing safety concern. Weaver moved efficiently to assess the space, recommend the appropriate camera, and complete installation and configuration with minimal disruption to the classroom.

1

Assess

SITE VISIT

Reviewed the storage room and how students were gaining access.

2

Recommend

RIGHT-SIZED

Selected one Verkada camera compatible with the existing platform.

✓

Monitored

INSTALLED

Installed and configured with minimal disruption to the classroom.

OUTCOMES

Continuous visibility, with no added overhead.

The storage room in the Special Education classroom is now monitored continuously, providing visibility that deters unauthorized access. Medications and secured materials are protected, and the camera integrates directly with the district's existing Verkada platform, with no additional management overhead.

■ Targeted, proportionate safety solution	■ Seamless integration with existing Verkada platform	■ Rapid deployment with minimal disruption
■ Improved safety for Special Education students	■ Medications and materials protected	■ No additional management overhead

THE RIGHT REASON

Exactly what was needed

Weaver recommended a focused, proven solution rather than an overly engineered one. The goal was student safety, and the solution was sized to that goal.

Trust built over multiple projects

The district turned to Weaver because of prior Verkada work across the district. Familiarity with the environment meant the district knew the work would be done right.

A COMMON CHALLENGE IN TEXAS K-12

Classrooms that serve students with specialized needs often hold medications and materials that must stay secured, in spaces where staff attention is already stretched. A small, well-placed addition to an existing camera platform can close that gap without a major project.

Have a specific safety concern?

Weaver can look at the space with you and recommend the smallest solution that solves it.
